Contents

1	Introduction	11
1.1	Dangers of uncertainties in optimization	12
1.2	Robust optimization models	15
1.3	Related approaches	19
1.4	Precursors of robust optimization	21
1.5	Exercises	21
1.6	Notes and sources	23
	Robust Linear Optimization	24
2	Uncertain Linear Optimization Problems and their Robust Counterparts	25
2.1	Data uncertainty in Linear Optimization	25
2.2	Uncertain Linear Programs and their Robust Counterparts	30
2.3	Tractability of Robust Counterpart	38
2.3.1	The strategy	39
2.3.2	Tractable representation of (2.17): simple cases . . .	41
2.3.3	Tractable representation of (2.17): general case . . .	42
3	Robust Counterpart Approximations of Scalar Chance Constraints[†]	47
3.1	How to specify uncertainty set	47
3.2	Chance constraints and their safe tractable approximations	49
3.3	Safe tractable approximations of scalar chance constraints: basic examples	51
3.3.1	Illustration: Single-Period Portfolio Selection	58
3.3.2	Illustration: Cellular communication	61
3.4	Extensions	67
3.4.1	Examples	76
3.4.2	More examples	81
3.4.3	The summary	86

4	Globalized Robust Counterparts of Uncertain LO Problems	89
4.1	Globalized Robust Counterpart – motivation and definition	89
4.2	Computational tractability of GRC	91
4.3	Example: synthesis of antenna array	93
4.3.1	Building the model	93
4.3.2	Nominal solution: dream and reality	97
4.3.3	Immunizing against uncertainty	98
5	Robust discrete optimization	105
5.1	Robust mixed integer optimization	106
5.2	Robust binary optimization	112
5.3	Robust network flows	116
5.4	Robust inventory theory	120
5.5	Summary	127
5.6	Exercises	127
5.7	Notes and sources	130
6	Robust Markov Decision Processes	131
6.1	Markov decision processes	131
6.2	The robust control problems	135
6.3	The Robust Bellman Recursion	138
7	More on Robust Counterpart Safe Tractable Approximations of Scalar Chance Constraint[†]	143
7.1	Robust Counterpart form of a safe convex approximation to a scalar chance constraint	144
7.2	Bernstein approximation of a chance constraint	145
7.3	From Bernstein approximation to Conditional Value at Risk and back	156
7.4	Majorization	170
7.5	Beyond the case of independent linear perturbations	177
7.5.1	Dependent linear perturbations	177
7.5.2	Extensions to quadratically perturbed chance constraints	186
	Robust Conic Optimization	206
8	Uncertain Conic Optimization: the Concepts	207
8.1	Uncertain Conic Optimization: preliminaries	207
8.1.1	Conic Programs	207
8.1.2	Uncertain Conic Problems and their Robust Counterparts	209
8.2	Robust Counterpart of uncertain conic problem: tractability	210

8.3	Safe tractable approximations of RC's of uncertain conic problems	211
9	Uncertain Conic Quadratic Problems with Tractable Robust Counterparts	215
9.1	A generic solvable case: scenario uncertainty	215
9.2	Solvable case I: simple interval uncertainty	216
9.3	Solvable case II: unstructured norm bounded uncertainty	218
9.4	Solvable case III: convex quadratic inequality with unstructured norm-bounded uncertainty	222
9.5	Solvable case IV: CQI with simple ellipsoidal uncertainty	223
9.6	Illustration: robust linear estimation	227
10	Uncertain Conic Quadratic Problems: Tight Tractable Approximations of RC's	233
10.1	The case of structured norm-bounded uncertainty	233
10.1.1	Approximating the RC of uncertain Least Squares inequality	235
10.1.2	Least Squares with structured norm-bounded uncertainty, complex case	238
10.1.3	From uncertain Least Squares to uncertain CQI	243
10.1.4	Convex quadratic constraint with structured norm-bounded uncertainty	246
10.2	The case of \cap -ellipsoidal uncertainty	249
10.2.1	Approximating the RC of uncertain Least Squares inequality	250
10.2.2	From uncertain Least Squares to uncertain CQI	253
10.2.3	Convex quadratic constraint with \cap -ellipsoidal uncertainty	253
11	Uncertain Semidefinite Problems with Tractable RC's	257
11.1	Uncertain Semidefinite problems	257
11.2	Tractability of RC's of uncertain Semidefinite problems	258
11.2.1	Unstructured norm-bounded perturbations	260
11.2.2	Application: Robust Structural Design	261
11.2.3	Applications in Robust Control	270
12	Uncertain Semidefinite Problems: Tight Tractable Approximations of RC's	277
12.1	Tight tractable approximations of RC's of uncertain SDPs with structured norm-bounded uncertainty	277
12.1.1	Uncertain LMI with structured norm-bounded perturbations	277
12.1.2	Application: Lyapunov Stability Analysis/Synthesis revisited	279

13 Safe Tractable Approximations of Chance Constrained Uncertain Conic Quadratic and Semidefinite Problems[†]	287
13.1 Chance Constrained LMIs	287
13.1.1 Preliminaries	288
13.1.2 The approximation scheme	292
13.1.3 A modification	298
13.1.4 Gaussian majorization	304
13.2 Chance Constrained LMIs: Special cases	307
13.2.1 Diagonal case and Chance Constrained Linear Optimization	308
13.2.2 Arrow case and Chance Constrained Conic Quadratic Optimization	314
13.2.3 Application: Recovering signal from indirect noisy observations	318
14 Globalized Robust Counterparts of uncertain conic problems	331
14.1 Globalized Robust Counterparts of uncertain conic problems: definition	331
14.2 Safe tractable approximations of GRC's	333
14.3 GRC of uncertain constraint: decomposition	335
14.3.1 Preliminaries	335
14.3.2 The main result	335
14.4 Tractability of GRC's	337
14.4.1 Preliminaries	337
14.4.2 Efficient bounding of $\Phi(\cdot)$	339
A	347
A.1 Notation	347
A.2 \mathcal{S} -Lemma	348
A.3 Approximate \mathcal{S} -Lemma	350
A.4 Matrix Cube Theorem	356
A.4.1 Matrix Cube Theorem, Complex case	356
A.4.2 Proof of Theorem A.3.(i)	358
A.4.3 Proof of Theorem A.3.(ii)	358
A.4.4 Proof of Theorem A.3.(iii)	361
A.4.5 Completing the proof of Theorem A.3.(iii)	369
A.4.6 Proof of Theorem A.3.(iv)	371
A.4.7 Matrix Cube Theorem, Real case	371
A.5 Theorem 13.2	373
A.6 Proof of Theorem 7.1	374
A.7 Proofs of Propositions 7.4, 7.10 and Theorems 7.2, 7.3	377
A.8 Proofs of Proposition 13.1 and Theorem 13.3	383
