

Logistics Systems Design: Supply Chain Systems

1. Introduction
2. Forecasting
3. Transportation Systems
4. Transportation Models
5. Inventory Systems
6. Supply Chain Systems

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Supply Chain Networks

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Common Logistics Questions

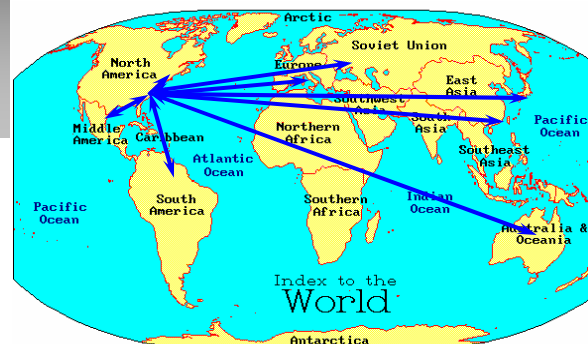

- * Where to purchase ?
- * Where to produce ?
- * Where to assemble ?
- * Where to hold in inventory ?
- * How to transport ?
- * How to deliver ?
- * How to expand or retreat ?
- * How to recycle ?

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

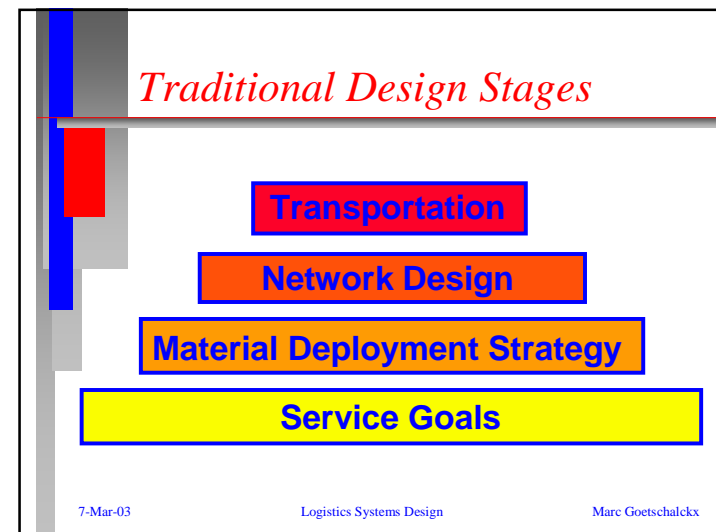

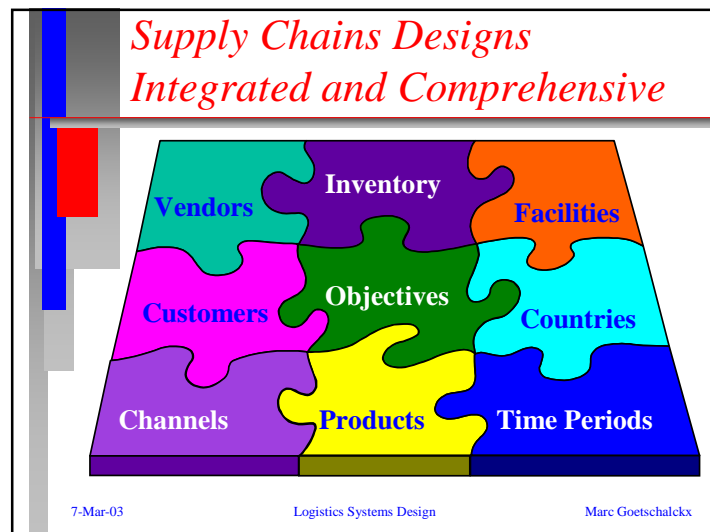

Supply Chains Are Global and Ever Changing

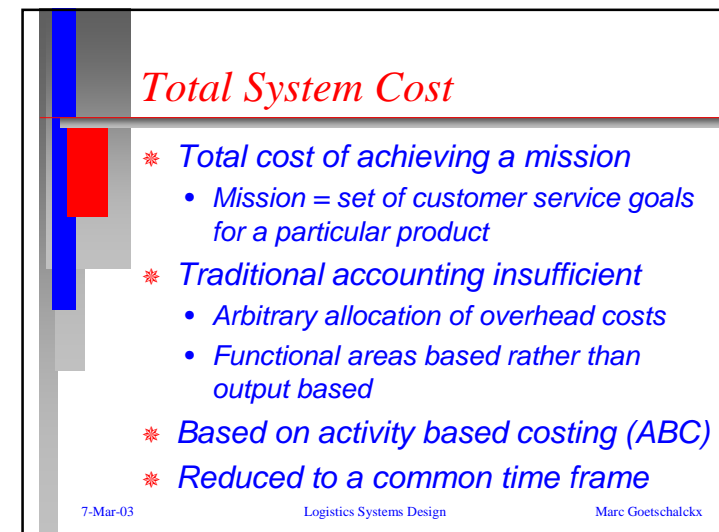

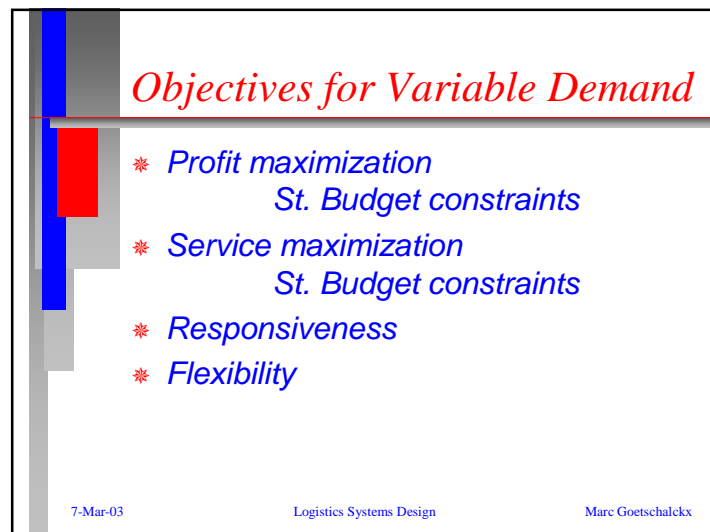

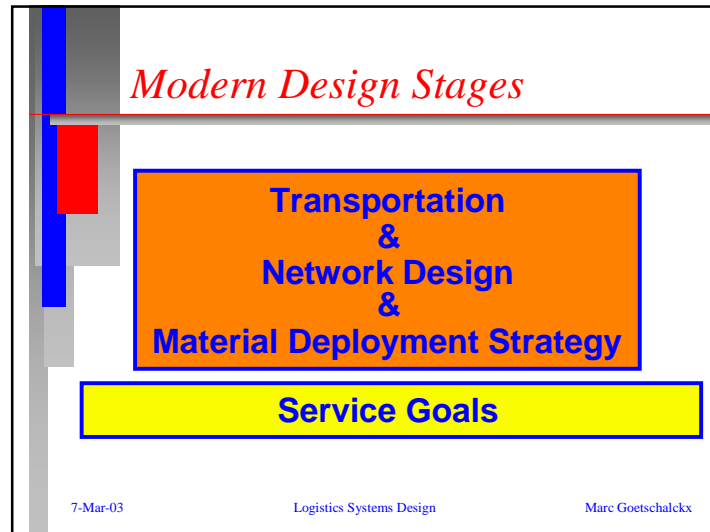

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Cost Categories

- * *Controllable vs. Non-controllable*
 - *Avoided if the mission were discontinued*
 - *Transportation vs. Pension liabilities*
- * *Fixed vs. Variable*
 - *Fixed are incurred when an activity is executed*
 - *Variable change with the intensity of the activity*

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Total System Cost Components

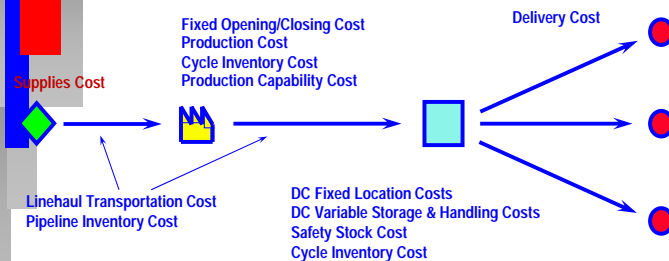

- * *Raw material costs*
- * *Production costs*
- * *Linehaul transportation costs*
- * *Local delivery costs*
- * *Facility costs*
- * *Storage and handling costs*
- * *System inventory costs*

7-Mar-03

Marc Goetschalckx

Costs Schematic

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

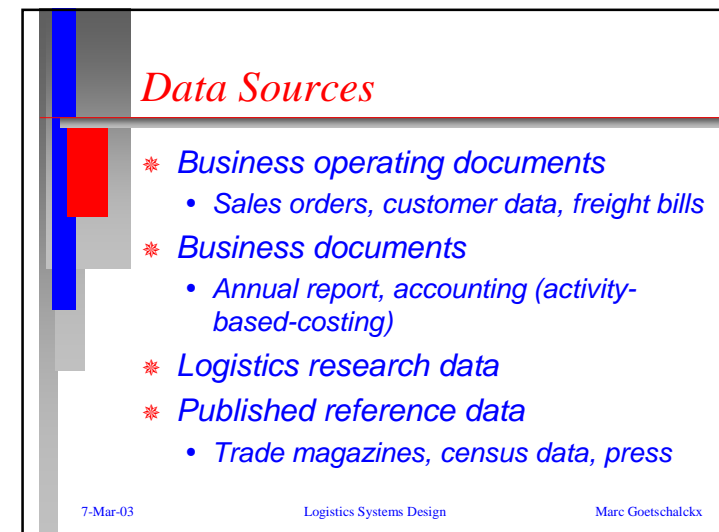

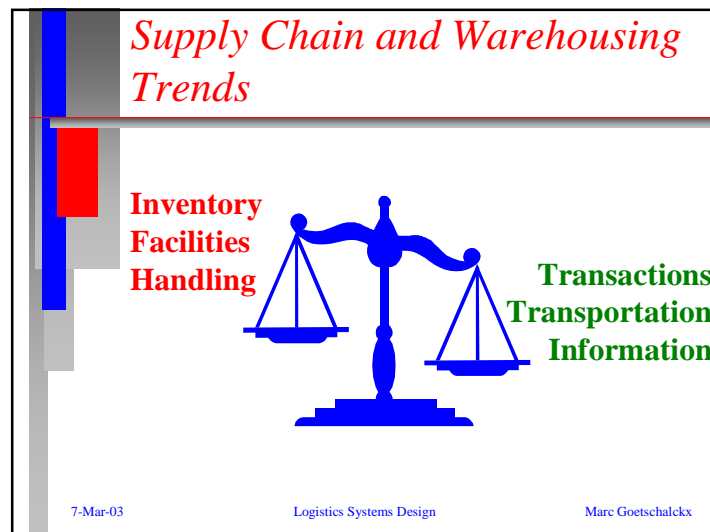

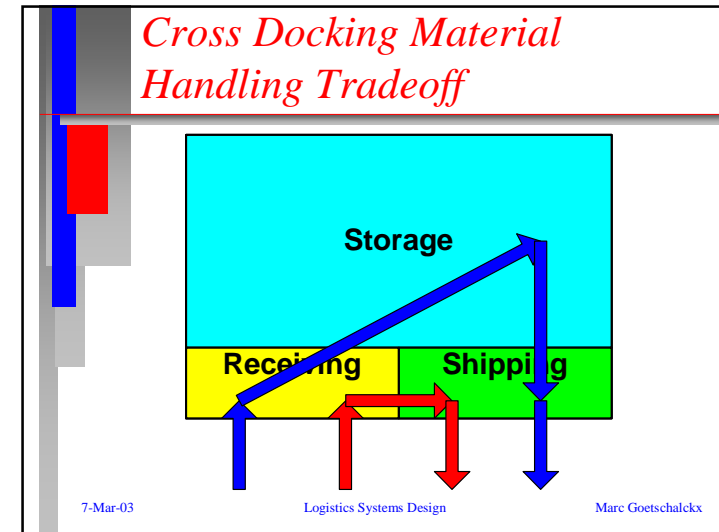

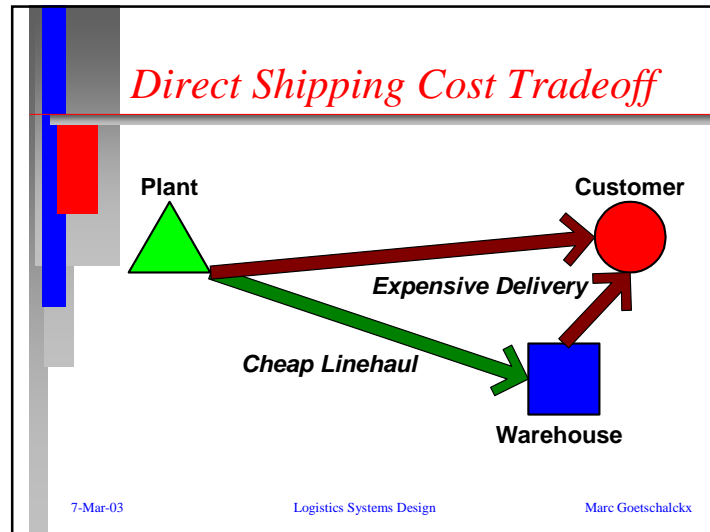

Depot Technology or Size Costs

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Data Encoding

- * Group technology and coding
- * Product coding
 - Bar codes, radio frequency tags, smart cards
- * Geocoding
 - Zip codes
 - City and state names

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Geocoding

- * Converts alphanumeric location data into geographical data
 - From zip codes and city, state
 - To longitude-latitude or rectangular coordinates
- * Grid overlay, spreadsheets, or reference databases
- * User interface and display
- * Numerical computations

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

DEC Incinerator Data

	A	B	C	D	E
1	City	State	Annual Volume		
2	Boston	MA	30,000		
3	Chicago	IL	240,000

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Geocoding Example: Average Customer Demand by State

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Constraints

- * Conservation of flow
- * Capacity and demand
- * Consistency or linkage
- * Elastic or soft constraints with penalty cost

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Units of Analysis

- * Units of material flow and storage
- * Monetary units
- * Units of time (major and minor)
- * Information units

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Model Characteristics

- * Multi-country
- * Multicommodity
- * Multi-echelon
- * Multi-period
- * Capacitated facilities
- * Capacitated channels
- * Deterministic or stochastic

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Logistics Objects

- * *Products - commodities*
 - *In transformation*
 - *In transportation*
 - *In storage*
- * *Countries*
- * *Periods*
- * *Resources*

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Logistics Objects Continued

- * *Facilities*
 - *Sources = suppliers*
 - *Sinks = customers*
 - *Intermediate = transformers (manufacturing and distribution)*
- * *Transportation channels*

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Period Characteristics

- * *Major period*
 - *Strategic planning*
 - *Year, season*
 - *Ordered sequence*
- * *Minor period*
 - *Demand process*
 - *Day, week*
- * *Consistency*

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Product Types

- * *Convenience and commodities*
 - *Multiple sales points*
 - *Food items, office supplies*
- * *Comparison shopping*
 - *Fewer sales points*
 - *Cars, fork lift trucks*
- * *Specialty products*
 - *Very limited distribution*
 - *Art, specialized machines*

7-Mar-03

Marc Goetschalckx

Product Life Cycle Graph

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Product Life Cycle Characteristics

- * *Introduction*
 - *Limited availability*
 - *Few sales points and channels*
 - *Centralize distribution*
- * *Growth*
 - *Expanding channels and sales points*
 - *Flow quantity more important than cost*

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Product Life Cycle Characteristics (2)

- * *Maturity*
 - *Stable sales volume*
 - *Many sales points and channels*
 - *Optimization opportunity*
- * *Decline*
 - *Declining sales volume*
 - *Decreasing sales points and channels*
 - *Centralized distribution*

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Product Characteristics

- * Differs from other products
 - Size
 - Weight
 - Value
 - Urgency
 - Risk characteristics
 - Obsolescence
- * Limited number, less than 12 to 20

Customer Types

- * Customer types
 - Consumer products
 - Industrial products

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Customer Characteristics

- * Ultimate sink for all materials
- * Differs from other customers
 - Location
 - Product demand
 - Service level
- * Fixed location
- * Demand for individual products
 - Customer-product matrix

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Customer Characteristics (2)

- * Single sourcing restrictions
 - None
 - By product
 - All products combined (depot)
- * Service constraints
 - Maximum time
 - Maximum distance
- * No more than a few hundred

Logistics Systems Design

Marc Goetschalckx

Product Sales Pareto Analysis

- * Concentration / differentiation phenomenon
- * Also called 80-20, ABC, fast-medium-slow

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Product Sales Pareto Curves With Benders Formula

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Pareto Curve Formulations

- X =cumulative products,
- Y =cumulative sales,
- A =parameter
- **Benders**
$$Y = \frac{(1+A)X}{A+X}$$
- **Power**
$$Y = X^A$$
- **Exponential**
$$Y = 1 - e^{-AX}$$

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Benders Pareto Formulation

* **Curve** $Y = \frac{(1+A)X}{A+X}$

* **Parameter** $A = \frac{X(1-Y)}{Y-X}$

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Benders Least Squares Parameter Estimation

* **Minimize sum of squared deviations**

$$\text{Min } SSE = \sum_i (Y_i - \hat{Y}_i)^2 = \sum_i \left(Y_i - \frac{(1+A)X_i}{A+X_i} \right)^2$$

* **Set partial derivative equal to zero**

$$\frac{dSSE}{dA} = \sum_i \frac{Y_i(X_i - X_i^2)}{(A+X_i)^2} - \sum_i \frac{(1+A)(X_i^2 - X_i^3)}{(A+X_i)^3} = 0$$

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Benders Pareto Curves for Different A Parameters

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Bender's Pareto Curve Observations

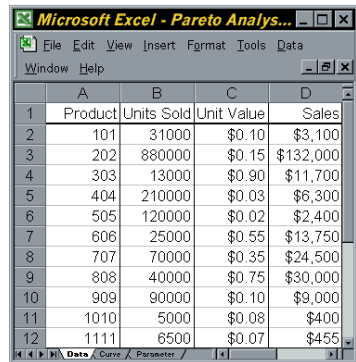

- * **More concentration / differentiation**
 - Smaller A parameter
 - More skewed curve
- * **ABC classification and curve name**
 - Class breakpoints based on slope
- * **Data - information - knowledge example**

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Benders Pareto Curve Example: Data

	A	B	C	D
	Product	Units Sold	Unit Value	Sales
1				
2	101	31000	\$0.10	\$3,100
3	202	880000	\$0.15	\$132,000
4	303	13000	\$0.90	\$11,700
5	404	210000	\$0.03	\$6,300
6	505	120000	\$0.02	\$2,400

Customer Service

- * Many components
- * Many definitions
- * Very qualitative

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Customer Service Stages

- * Pre-transaction
 - Declaring policies and procedures
- * Transaction
 - Inventory levels and location
 - Transportation channels
 - Ordering and billing systems
- * Post-transaction
 - Maintenance and service (CALS)
 - Warranties

7-Mar-03

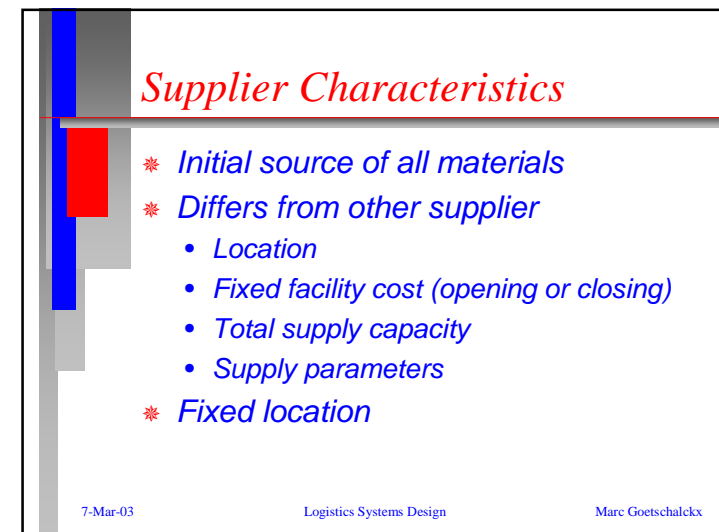

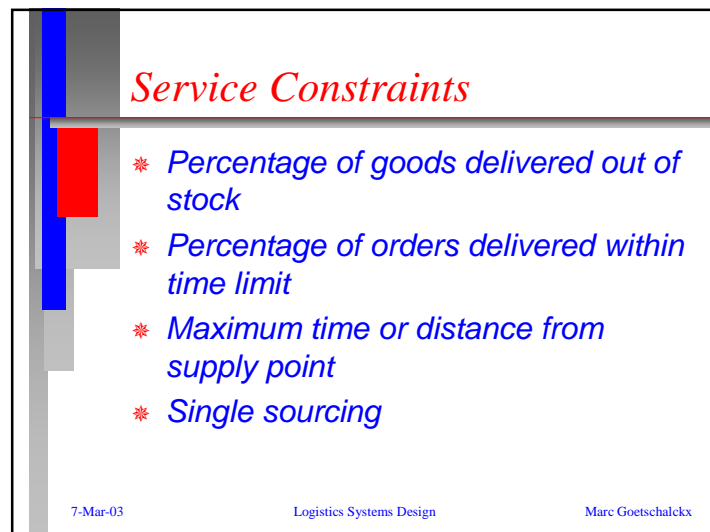

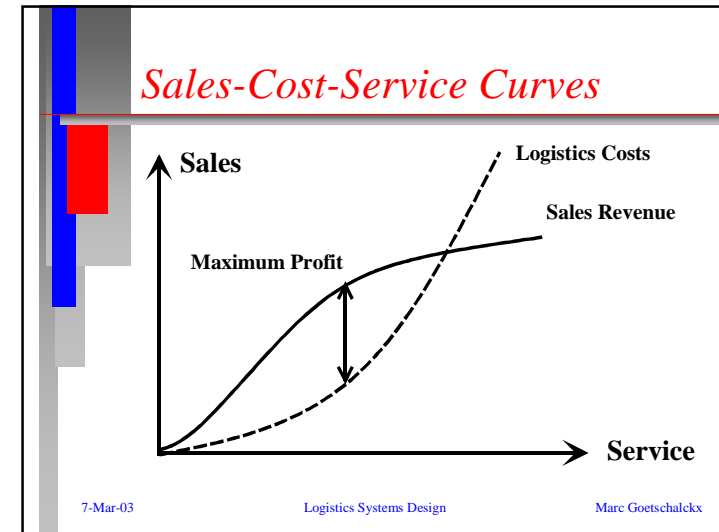

Marc Goetschalckx

Order Cycle Time

- * Time between order placement and product receipt
- * Wide range (instantaneous to 30 months)
- * Components
 - Order processing
 - Production
 - Order assembly and order picking
 - Transportation

7-Mar-03

Marc Goetschalckx

Supply Characteristics cont.

7-Mar-03 Logistics Systems Design Marc Goetschalckx

Supply Chain Systems Strategies: Transformation

- * Manufacturing facilities strategy
 - Regionalization
 - Consolidation
 - Product Focus
 - Process Focus
 - Dispersion

7-Mar-03 Logistics Systems Design Marc Goetschalckx

Supply Chain Systems Strategies: Transformation

- * *Distribution network strategy*
 - *Consolidation*
 - *Customer Focus*
 - *Co-Location*

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Design Software Requirements

- ❶ *User Friendly*
- ❷ *Generation of Reports, Maps, & Visuals*
- ❸ *High Fidelity Economic Representation*
- ❹ *High Degree of Optimization of the Results*

Ballou & Masters, "Commercial Software for Locating Warehouses and Other Facilities," *Journal of Business Logistics*, Vol. 35, No. 2, 1993.

Logistics Systems Design

Marc Goetschalckx

Design Decision Support System Components

- * *System data and data base*
- * *Design models*
- * *Solution algorithms*
- * *Reports, displays and interactive executive*

Logistics Systems Design

Marc Goetschalckx

CIMPEL

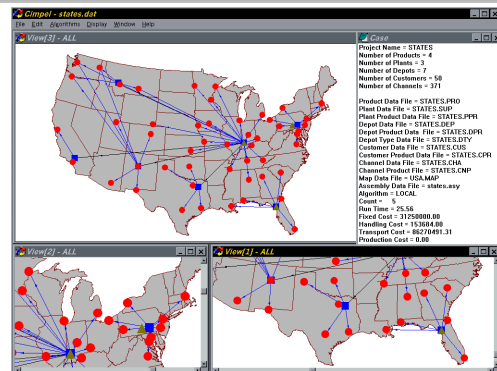

- * *Cost Minimization St. Service Constraints*
- * *Neutral Data Base*
- * *Comprehensive Integrated Model*
- * *Algorithm Toolkit*
- * *Standard Interactive Color Graphics Interface*

Strategic Modeling of Logistics Systems

Marc Goetschalckx

Enterprise Resource Planning (ERP) Software

- * Logistics Systems Status
- * "Bookkeeping"
 - Transactional
 - Data Warehouse
- * Advantages
 - Enterprise Standardization
 - Data Integration
 - Up-To-Date Data
 - Multinational

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

ERP Vendors

- * Growing Importance
- * Major Vendors
 - SAP (Financial),
 - Baan (Manufacturing),
 - PeopleSoft (Human Resources)
 - ...

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Supply Chain Management (SCM) Software

- * Logistics Systems Configuration and Planning
- * "Optimizing"
 - Operations Research
 - Constraint Based Logic
- * Interface with ERP

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

SCM Vendors

- * Strong Consolidation
- * Major Vendors
 - I2 - InterTrans
 - Manugistics
 - Chesapeake - SupplyChain

Logistics Systems Design

Marc Goetschalckx

Supply Chain Design Challenges

- * *Integrated models are large and complex*
 - *More tactical effects (seasonal, inventory)*
- * *Multi-objective performance measures*
 - *Cost/profit, flexibility, and responsiveness tradeoffs*
- * *Strategic design as a continuous effort*
 - *Models, data, algorithms*

7-Mar-03

Logistics Systems Design

Marc Goetschalckx

Supply Chain Design Challenges Continued

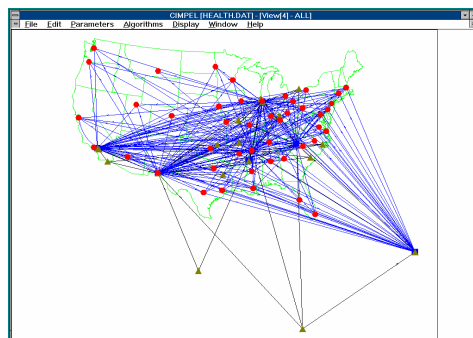

- * *Technology transfer to logistics professionals and students*
 - *Toy cases and black-box software*
