I am looking for highly motivated and self-driven Ph.D. students, who are interested in developing principled methodologies, efficient and scalable optimization algorithms, and practical theories for machine learning.

Prospective candidates should have an excellent background in computer science, electrical engineering, mathematics, physics, statistics, or other related fields. Coding skills, as well as related experiences are desirable. Most important is a strong enthusiasm in the cutting-edge research of machine learning.

More about my research can be found on

http://www2.isye.gatech.edu/~tzhao80/

Prospective candidates are encouraged to apply to the PhD program in Machine Learning at Georgia Tech:
